RABBIT

An ancient symbol of fertility, the rabbit has been put to use by the fairies for pulling their trains through the garden. Available in white or brown. \$150

ENGINES

The engines are a dragon, a swan or a rabbit. They run on standard G-scale track with a transformer, much like Malibu lights. The track and scenery stay outdoors, rain or shine, while most people bring the train itself in out of the weather.

Each engine can pull 4-6 cars on flat track.

Decoration may include flowers or ribbons in different colors. When you order a swan or rabbit, we can email you photos of what we have in stock, so you can choose the one you like.

Your garden fairies can choose from a variety of cars. Each car is sculpted in wax or clay. Then we make a silicone mold from the original. Each mold can cast 20–25 individual cars, then a new mold must be created. Each car is cast in our home workshop in a urethane resin. We clean up and sand each piece, then most pieces are sprayed with an alkyd primer, in preparation for the detail painting. Some cars are get their color from dye in the resin. Every car is a work of art in its own right, and is dated and numbered. Sure to please the magic folk in your garden as well as human visitors.

Someone left an old shoe in the garden, and the fairies have put it to good use.

Cars

The fairies like to use things they find in the garden in surprising ways. They turn a couple of leaves into a boat, and create a cozy home from a small pumpkin. The bees are more than happy to share their hive with the fairies too.
